PROFESSIONAL SUMMARY

People-first Technical Product Manager and Senior Delivery Leader with 17+ years of experience driving roadmap commitments on time and within budget across \$25M+ BFSI transformation portfolios, partnering with Product, QA, and senior engineering leadership to build high-performing engineering teams. Proven expertise in estimation accuracy, milestone accountability, performance management, and fostering cultures of continuous improvement and engineering excellence — backed by a strong software engineering background in .NET, cloud (GCP), and Generative AI. Calm, commercially aware, and adept at communicating across technical and non-technical stakeholders to ensure compliance with security and regulatory standards while delivering predictable, on-budget execution across multiple concurrent programs.

PROFESSIONAL EXPERIENCE

Cognizant (Deputed to American Express)

Senior Technical Project Manager / Senior Manager – Project

London, UK

Jan 2018 – Present

- Achieved on-budget delivery across a \$25M+ transformation portfolio by owning estimation accuracy, delivery planning, and milestone accountability for 15+ concurrent banking applications, resulting in zero cost overruns across multi-year engagements.
- Achieved \$500K in annual operational savings by leading end-to-end cloud infrastructure migration of in-house servers to GCP, managing a cross-functional team of 50+ engineers and ensuring zero unplanned downtime, resulting in measurable engineering excellence and cost efficiency.
- Achieved 100% regulatory compliance by leading the full-cycle India Data Localization (IDL) program, partnering with QA, Legal, and senior engineering leadership to enforce security standards and compliance controls across all impacted systems, resulting in zero audit findings.
- Achieved a 30% reduction in manual reporting effort by spearheading GenAI proof-of-concept initiatives using open-source LLMs (Mistral, Falcon) and ChatGPT APIs with LangChain, fostering a culture of continuous improvement and automation within engineering teams.
- Achieved consistent on-time roadmap commitments by communicating delivery status, risks, and milestone updates clearly to both technical and non-technical stakeholders including C-suite sponsors, resulting in sustained client satisfaction and contract renewals across 7+ years of engagement.

Kellton Tech Solutions Ltd

Associate Technical Manager / Technical Lead

India

Aug 2011 – Dec 2017

- Achieved accelerated delivery cycles in a product-led environment by owning end-to-end technical requirements, architecture design (HLD/LLD), and prototype delivery for Guru.com, a global SaaS freelance marketplace serving thousands of concurrent users, resulting in a 20% reduction in rework cycles.
- Achieved measurable team performance improvement by coaching and mentoring a cross-functional team of developers, tech leads, and QA engineers, implementing structured code review and Agile sprint processes, resulting in a 25% improvement in sprint velocity and consistent milestone accountability.
- Achieved predictable, on-budget execution across multiple concurrent client projects by instituting rigorous backlog management, estimation accuracy reviews, and SAFe Agile delivery frameworks, resulting in on-time delivery for 95% of committed sprint milestones.

Enliven Softwares Pvt. Ltd.

Senior Software Engineer / Technical Lead

India

Nov 2009 – Jul 2011

- Achieved high-quality product delivery in a product-led environment by bridging client requirements and engineering execution, creating detailed requirement documents, prototypes, and architecture designs that reduced ambiguity and accelerated sprint planning cycles.
- Contributed to commercial growth by supporting pre-sales activities, translating complex technical capabilities into clear business value propositions for prospective clients, demonstrating commercially aware communication across stakeholder levels.

DbyDx Software Pvt. Ltd.

Software Engineer / Senior Software Engineer

India

Feb 2008 – Oct 2009

- Built foundational software engineering expertise across the full SDLC — including HLD/LLD design, coding, unit testing, and client communication — establishing a strong technical background that underpins current delivery leadership capabilities in product-led environments.

- Achieved strong client relationships by communicating clearly with both technical and non-technical stakeholders to gather requirements, manage expectations, and deliver solutions aligned with business goals.

Parsec Technologies Pvt. Ltd.

Software Engineer

India

Jun 2006 – Feb 2008

- Achieved product stability and customer satisfaction by performing systematic bug fixes and implementing new features in a product-led environment, applying unit testing and QA disciplines that established early engineering excellence habits.

TECHNICAL SKILLS

Delivery & Product Leadership: Technical Product Management, Roadmap Commitments, Milestone Accountability, Estimation Accuracy, Delivery Planning, Performance Management, People-First Leadership, Continuous Improvement, Engineering Excellence, Agile (SAFe, Scrum), JIRA, MS Project, Clarity PPM

Cloud & Infrastructure: GCP (Google Cloud Platform), Cloud Migration, Server Infrastructure, Big Data Platforms

Generative AI & ML: LangChain, ChromaDB, OpenAI ChatGPT API, Mistral, Falcon (open-source LLMs), Generative AI, Proof-of-Concept Design

Programming & Frameworks: C#, ASP.NET, .NET Core, JavaScript, Angular JS, TypeScript, REST APIs

Databases: SQL Server, ChromaDB, Big Data Platforms

Methodologies & Practices: SAFe Agile, Scrum, Sprint & Backlog Management, HLD/LLD Architecture Design, Code Review, SDLC, SLA Management

Compliance & Security: Regulatory Compliance, Data Localisation (IDL), Security Standards, Risk Management, Audit Management

Tools: JIRA, MS Project, Clarity PPM, Visual Studio, Git, Confluence, ServiceNow

EDUCATION

Bachelor of Technology – Computer Science & Engineering

UP Tech University, India

2002 – 2006
